

Like seashells, we  
are beautiful and  
unique with a  
story to tell

## YOUTH ACTIVITIES APRIL

Happy April everyone....we will be needing those April showers to bring those May flowers and crops!!

I hope everyone was able to get their reports in and their Illustrating America Contest pieces gathered. Remember, the winning entries need to be to Department (me) by April 15th. I have to have them to National by May 5th. Make sure all rules have been followed so none have to be discarded by the time I receive them....thank you all for what you have done!

I have received some AMAZING reports of what all you Auxiliaries have done!! We have a lot of very lucky youth that have received so much from all of our Auxiliaries....NICE JOB KANSAS!!! You all are so generous with your giving of time and money!!! Thank you!!

If you still have projects to complete that you missed this last reporting deadline, just wait and report it for next one. Don't stop working the program as our last reporting period is over....school is still in session and our youth need our help with donations yet I am sure. After prom parties, school parties, library parties, Scouts....you name the group...I am sure they can use some money or other donations to make their experiences meaningful and fun.

I received the correct answer from Linda Vann-Owen's from Manhattan Auxiliary #1786, in the nip of time....in naming my conch that I had displayed last month on my March Edition...Congratulations Linda!!! It was a Turritella...as I said, it was not a very common one to see. So.....you know that "Seashells by the Seashore" tongue twister.....if you can tell me the year it was created....please send me your answer and I will put you in for a prize drawing.
